

Aurora X1 - Autonomous Warehouse Robot

Atlas Dynamics - Product Specification Sheet

Overview

The Aurora X1 is an autonomous mobile robot designed for warehouse and logistics environments. It navigates using a combination of LiDAR and camera-based SLAM, and can operate continuously alongside human workers.

Technical Specifications

Maximum payload	50 kg
Top speed	2.0 m/s
Battery runtime	8 hours per full charge
Full charge time	90 minutes
Navigation	LiDAR + camera SLAM
Connectivity	Wi-Fi 6 (5G optional)
Operating temperature	0 to 45 degrees Celsius
Weight	85 kg
Unit price	INR 12,00,000
Warranty	2 years standard

Deployment Notes

A single Aurora X1 can service a floor area of up to 2,000 square metres. Up to 20 units can be coordinated by one Atlas Fleet Controller. Firmware updates are delivered over the air and require no on-site technician.
